

We are looking for a **Back End Developer** to join our team.

Salary: Competitive | **Location:** Middlesbrough | **Type:** Permanent

Salesfire

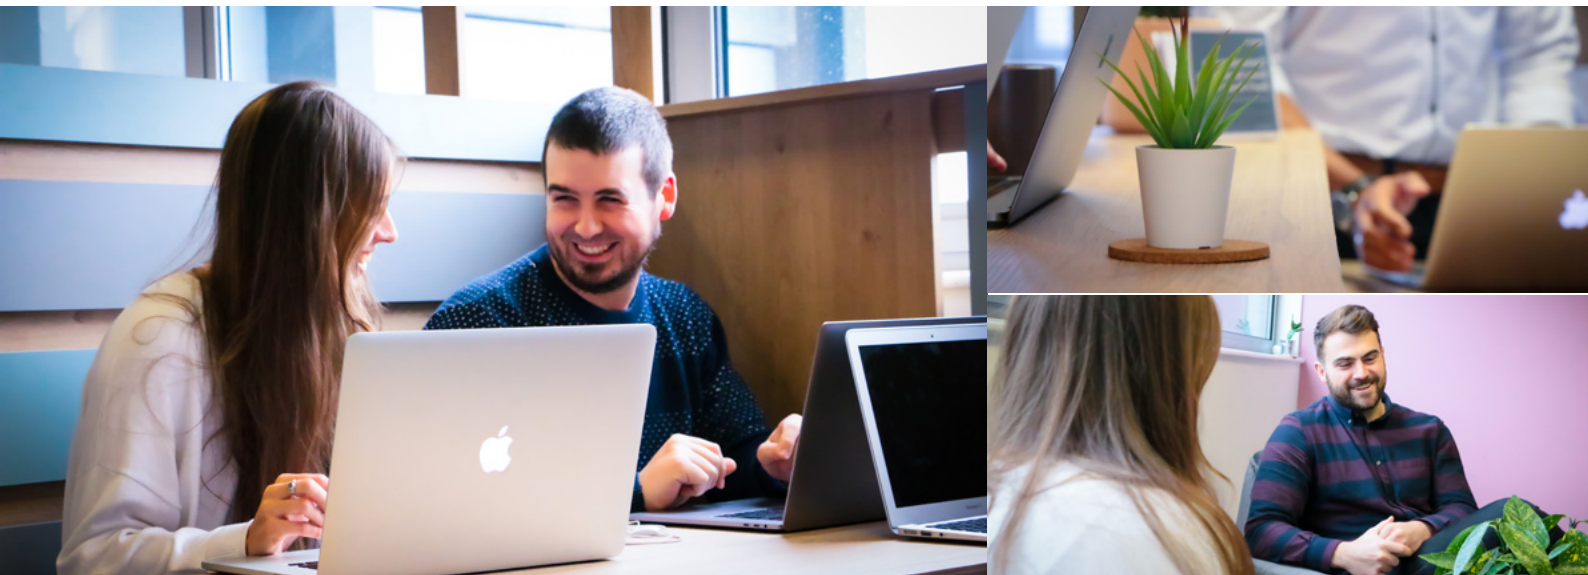

BACK END DEVELOPER
JOB DESCRIPTION

About Salesfire

Launched in 2017, Salesfire is a Software as a Service company focusing on tools to help online businesses improve their conversion rate and maximise sales. We are constantly looking for talented individuals to expand our team and add to the success of the business.

As Salesfire continues to grow, we're expanding our development team to help us improve and develop our product offering and are seeking a talented PHP developer who is passionate about building robust and scalable back end services.

We are based in the digital heart of Middlesbrough with excellent links to public transport (bus and train) and easily commutable by car.

Your Responsibilities

- Build new features into the Salesfire platform
- Write server-side code, create robust high-volume production applications
- Ensure the reliability of systems critical to Salesfire customers
- Practice disciplined software engineering (e.g. code reviews, writing clean and pragmatic code)
- Contribute to the back end coding standards

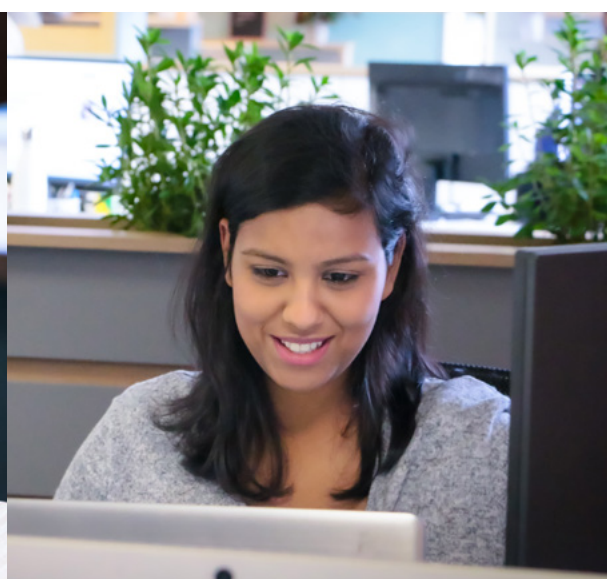

Desired Qualifications / Experience

- Proficient in Object Oriented PHP
- Experience with frameworks (we use Laravel and Lumen)
- Strong understanding of database schema design, caching and scalability
- Experience with NodeJS is beneficial
- Keep up to date with the newest technologies
- A strong understanding of, and practical experience with, web application development
- A sincere commitment to crafting readable and reliable code

Perks

- 24 days holiday plus bank holidays
- Pension scheme
- Flexible working
- A friendly and modern office environment
- Free fruit, toast and drinks
- Bi-annual staff parties and weekly Friday drinks
- And many more

How to apply

If you feel you would be a great fit for our team, please send your CV to and cover letter to our contact email address.
